

TECHNICAL DATA SHEET

CERA BARBOUR

CHARACTERISTICS

Special finishing with fattening and water-repellent effect for specific textiles.

Special wax for the finishing treatment of "Barbour" and similar.
Makes items of fishing and hunting waterproof and air-resistant.
Easy to use it does not greases, it does not leave bad smell.
The special resins and the oils keep the items treated longer.

APPLICATION AND DOSAGES

After having dry washed accurately the item with Dry Special Super for about 5-7 min. and after having dried it as normal, start with ironing, possibly with a dummy, put the item on the hot ironing table and spread the product on it, as the most uniform as possible with a sponge or with a brush.

Melt the wax in a double saucepan, to be well used it must result very clear; on the contrary the final result could not be satisfactory. To get better the finishing touch of the item, after having spreaded the wax, dry it in a dry cleaning machine at the temperature of 50-60 C° for 10 min. or in a dry cleaning machine at the end of the washing during the drying, so that the wax can became uniform eliminating all the stripes.

If the treatment is well executed, the item will result with a dark full colour, greasy to the touch and perfectly waterproof and well treated.

CONTENTS / TECHNICAL DATA

Appearance: pasty
odour: odourless
density: 1000 – 2000 g/l

DIRECTIONS

Store closed into the original packing, keep the local well airy.

The above information is only for guidance and we assume no obligation. The quantities to be used and the application methods may have to be modified according to plant conditions and the material to be treated.
